

We have made updates to the campus WiFi network.

To connect to the Wi-Fi please use the following settings:

Wireless Network (SSID):

HSCWiFi2

or

HSCWiFi5

If your device is 5 Ghz Wi-Fi capable it will see both SSID's.
If your device sees HSCWiFi5 please use this SSID for faster speeds.

You will need to open a web browser on your device if a browser does not open automatically and sign in with your H-SC username and password the first time that you connect to the system.

Tired of logging in?

If you would like to register your device on the campus WiFi network, log into TigerWeb and select **Register your MAC Address**. Instructions for finding the MAC address of your device are available within TigerWeb.

If you need assistance or have questions, please contact the Computing Center Helpdesk.
