

Using WiFi at Hampden-Sydney College

- Applies to only Brown Student Center and Brinkley Hall

To connect to the WiFi choose either **HSCWiFi** or **HSCStudentsSecured**.

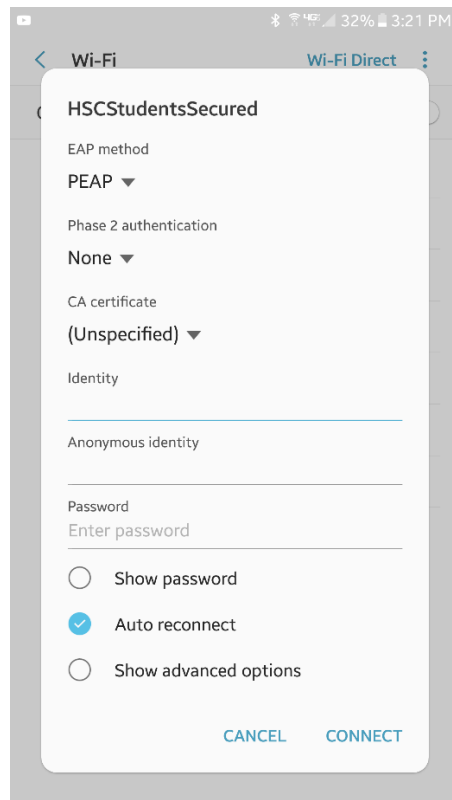

- We recommend using this HSCStudentsSecured as it is a secured, encrypted connection. It also does not prompt you to login each time after the initial login, and HSCWiFi will prompt you to log in again if you have been disconnected from these SSIDs for more than 4 hours.

To log in the HSCStudentsSecured, first select the SSID.

- From Windows devices, enter your username and password (HSC login credentials without '@hsc.edu') and select 'OK'
- From Apple devices, enter your username and password (HSC login credentials without '@hsc.edu'). After proceeding you will need to verify the certificate by clicking 'Continue' on the prompt.

- From Android devices, enter your username in the 'Identity' field and password in the 'Password' field (HSC login credentials without '@hsc.edu'); accept defaults for all other areas.

- From iOS devices, enter your username and password (HSC login credentials without '@hsc.edu') and click 'Join'. After joining the SSID, you will need to trust the certificate by selecting 'Trust' on the next prompt.
