

**The High Adventure program will give you a taste of real adventure around our campus and in our state through planned excursions throughout the academic year. Hiking, kayaking, mountain biking, and rafting, as well as learning to survive in the wilderness, cooking with fire, and bow drill-fire making are just a few of the activities that will challenge you and inspire you.**

## **High Adventure Vision**

Our vision is to provide Hampden-Sydney College (H-SC) students and the greater community twith quality outdoor experiences that ultimately promote personal enrichment and community enhancement. Through well-organized outdoor adventures, participants will have the opportunity to develop life-long recreational and leadership skills, enhance their abilities to work with others, and gain an appreciation for the natural environments in which we live.

Participants of all skill levels are welcome and encouraged to take part.
