NON-DISCRIMINATION POLICY STATEMENT

Hampden-Sydney College, while exempted from Subpart C of the Title IX regulation with respect to its admission and recruitment activities, does not discriminate on the basis of race, color, sex, religion, age, national origin, handicap, sexual orientation, or veteran status in the operation of its educational programs and with respect to employment.

For information on this non-discrimination policy, please contact:

Sue Carter

Director of Human Resources

Hampden-Sydney College

PO Box 25

Hampden-Sydney, VA 23943

(434) 223-6220

NOTICE OF SOLICITATION POLICY

The College does not permit any type of business solicitation on campus without written authorization from the Dean of Students and/or the Vice President for Business Affairs and Finance, who confer before a decision is reached. This applies to individuals, students, and non-students, and campus or non-campus groups or organizations, as well as electronic, print, or voice solicitation. Unauthorized solicitors should be promptly reported to the Dean of Students or the Vice President for Business Affairs and Finance.

F Sabb. Fall '26

S Sabb. Spring '27

Y Sabb. '26-'27

Purpose

The purpose of the Critical Incident Management Plan is to provide guidance for a coordinated approach to preparing for, responding to, and managing an emergency incident at Hampden-Sydney College. Ensuring the safety and well-being of students, faculty, staff, and visitors is the primary goal of College administrators and the Department of Public Safety and Police.

Core members of the Critical Incident Management Team (CIMT) will review the Critical Incident Management Plan on an annual basis and revise as needed. Before a date is set for review of the plan, notification will be sent to the Critical Incident Management Team.

Additionally, the plan will be reviewed as appropriate following an event that requires the activation of the Critical Incident Management Team.

Shared Responsibility

Although this document addresses the College's plan for emergency incidents, and the responsibilities of the Critical Incident Management Team, it also requires the participation of those in the community. Safety and security are the shared responsibility of everyone in the campus community. Federal government and Commonwealth of Virginia concepts of emergency management recognize that emergency management is relational. It is everyone's responsibility.

Emergency Response

Hampden-Sydney College police officers are trained to respond to emergency incidents on campus by using the principles and procedures of the National Incident Management System (NIMS). NIMS is a standardized, on-scene, all-hazards incident management approach that allows for a coordinated and integrated response to an emergency incident. When a serious incident occurs that causes an immediate threat to the campus, first responders to the scene are normally the H-SC Police Department, adjoining law enforcement agencies, local fire departments, and local Emergency Medical Services (EMS). They respond, assess the situation, and work together to manage the incident. Depending on the nature of the incident, other H-SC personnel, state, and federal agencies might be involved in responding to the incident.

If the emergency incident warrants additional resources and/or requires decisions to be made for the welfare of the campus community and/or property, the H-SC Critical Incident Management Team (CIMT) will convene.

To view the full version of the Critical Incident Management Plan, please visit www.hsc.edu/emergencies

Critical Incident Management Team (CIMT)

The CIMT is comprised of key College administrators and other support personnel who are responsible for providing a coordinated approach to preparing for, responding to, and

managing an emergency incident at Hampden-Sydney College. Any member of the CIMT should contact any other members at any time regarding emergency incidents.

During an emergency incident, the public safety official at the incident scene, who is acting as the incident commander, will initiate communication with the Emergency Management Coordinator. This communication is to ensure support and resources are available for scene management and that accurate information is provided to College officials for prompt decision making, and to the community for protective actions.

When time and circumstances permit, the Dean of Students makes recommendations to the President of the College. If the President is inaccessible, then the Dean of Students makes recommendations to the Provost and Dean of the Faculty.

CIMT members are as follows:

Dean of Students – Dr. Richard Pantele

Director of Public Safety and Chief of Police – Mr. Mark Fowler

Emergency Management Coordinator – Mrs. Jennie Jenkins

Provost and Dean of the Faculty – Dr. Tim Diette

Director of Facilities Management – Mr. Kevin Miller

Director of Human Resources – Mrs. Sue Carter

Director of the Computing Center – Mr. Todd Pugh

Supporting Members:

Manager of Client Services – Mr. Jason Huskey

Vice President for Communications, Marketing, and Information Services – Mr. Justin McGregor

Vice President for Business Affairs and Finance – Mr. Gary Ometer

Director of the Student Health Center – Mrs. Kim Ball

Director of Counseling – Dr. Clarence Merckerson

Fire Safety Supervisor: Mr. John Shelton

Sipp Associate Professor of Physics and Astronomy – Dr. Hugh Thurman

Professor of Physics and Astronomy – Dr. Stan Cheyne

Operations: Any member of the CIMT should contact any other member at any time regarding emergency incidents. Additionally, any member should take the initiative to convene a meeting of the CIMT whenever it is necessary to do so before, during, or after an emergency incident. The CIMT makes appropriate decisions and executes those decisions to ensure the safety and security of students, faculty, and staff.

Emergency Notification System (ENS)

Hampden-Sydney College relies on an approach which integrates emergency management, police, information technology, and communications principles and practices to notify the campus community of emergencies.

In the event of a campus-wide emergency, the College uses its “Emergency Notification System (ENS)” to notify the campus community. The system is only used for emergency communications.

In the event of an emergency, the ENS will send critical information, news, and instructions as follows:

- A message will be sent to all student, faculty, and staff H-SC email addresses.
- A text message will be sent to all H-SC student, faculty, and staff cell phones that have been registered (“opted in”) with the ENS.
- A message will be posted to the home page of the H-SC web site.
- A message will be posted on the computer monitor of all administrative and laboratory computers.
- A message will be posted on all electronic bulletin boards on campus.

Additionally, critical information, news, and instructions may be communicated through the following means, if deemed appropriate:

- A message will be recorded on the employee emergency/weather notification phone line, which is accessible for faculty, staff, and students by calling (434) 223-7003 to hear the message.
- A message will be broadcast from the carillon speakers on the roofs of Carpenter X Residence Hall and Venable Hall.
- Student Resident Advisors will be contacted and they will help spread a message to their residents.

Please note: The College will treat student, faculty, and staff cell phone numbers as confidential information and will not share, make available, sell, or trade your data with any other entity.

Additional Safety and Security Measures

Depending on the nature of the emergency, the following steps may be implemented if deemed appropriate:

- The H-SC Department of Public Safety and Police will contact other law enforcement agencies such as the Farmville Police Department, Prince Edward County Sheriff's Department, Longwood University Police Department, and the Virginia State Police. The College has functional Mutual Aid Agreements with each of these agencies.
- The H-SC Department of Public Safety and Police, along with Facilities Management, will control campus entrances and block entries or exits, if circumstances warrant and sufficient resources exist.

Please note: Hampden-Sydney College has open access and is geographically integrated in the surrounding community. Under any circumstances, it will be difficult—and perhaps impossible—to completely control access to and from the College by on-campus or off-campus persons.

ON-LINE SERVICES

HOW TO FIND STUDENTS, FACULTY, AND STAFF USING THE ON-LINE DIRECTORY

1. Go to the Homepage (www.hsc.edu).
2. Select *Faculty/Staff* from the left side bar.
3. Select *Directories*.
3. Select the desired directory from the list.
4. You will see an alphabetical list of the directory. If you want to search by last names, first names, department, or class year, use the dialogue box in the left column. After entering the information, click *Search*.
5. In order to see additional information, click *View More*.
6. You will be prompted for a username and a password to gain access to more information. Put in your username and password and then click *Log In*.

HOW TO USE THE COLLEGE'S TELEPHONE SYSTEM

Information on telephone, voice-mail, long distance codes, billing, and conference bridge is available at www.hsc.edu/telecommunications.html

1. When the sky begins to look ominous and you anticipate that there is a storm approaching, tune-in to a LOCAL television station for possible severe storm advisories. The local channels that carry weather alerts for our area are channels 6, 8, and 12. The Weather Channel (cable 19) also carries these. Also, most local radio stations carry the National Weather Service Warnings.

2. If there is a TORNADO WATCH in effect, stay tuned for further information. This means that conditions are favorable for the development of tornadoes.

A TORNADO WARNING means that a tornado has been seen in the designated area and that people in that area should seek appropriate shelter immediately. You may have only a matter of seconds or, at most, minutes to get to your sheltered area; therefore, think ahead and know where you would go in this emergency.

3. Appropriate shelter means going into an interior room on the lowest level of a building. Basements are best. Ideally, you should try to be in a small, interior room (or protected area) without windows or exterior doors. The smaller the room the better, as there is less ceiling to fall.

Note: Large structures with wide expanses of flat floor are not considered safe.

4. Once you have reached your shelter, crouch down and cover your head.

5. At night or in heavy rain, the only clue to a tornado's presence may be a roar.

Thunderstorms can also produce dangerous winds that produce a similar sound. If you hear any loud, roaring sounds during threatening weather, it is best to take cover immediately.

6. If you are outside and absolutely cannot get inside shelter, find the lowest ground you can (a roadside ditch, for instance) and lie flat as you can.

These are suggestions from the Safety Committee of Hampden-Sydney College.
