

Device management

Some devices may not be able to authenticate on the Wi-Fi network; for those cases, you will need to register your device and then join the device to TigerNet-Guest.

H-SC students are allowed 5 guest devices that they can manage through an online portal at <https://clearpass.hsc.edu/guest>. At this portal, log in with your H-SC credentials (without “@hsc.edu”).

The image shows a web browser window displaying the login page for Hampden-Sydney College's Wi-Fi network. The browser's address bar shows the URL https://clearpass.hsc.edu/guest/auth_login.php. The page features a background image of a college building and a sign that reads "HAMPDEN HOUSE". Overlaid on this background is a semi-transparent white box containing the college's crest at the top, followed by the text "Hampden-Sydney College" and "Wi-Fi" in a large, bold font. Below this text are two input fields: "Username" and "Password". A red "Log In" button is positioned below the password field. At the bottom of the white box, the text "Hampden-Sydney College" and "© Copyright 2021" is displayed.

Once logged in you will see the following options:

Create Device
Home / Devices / Create Device

Use this form to register a new device.

Register HSC Student Device

*** Device Name:**

Name of the device.

*** MAC Address:**

MAC address of the device.

AirGroup:

Enable AirGroup
AirGroup uses device ownership and location information to limit the printers and Apple TVs available to network users.

*** Registered By:**

timtest

Create Device

* required field

[Manage my devices](#)

You will need to enter the MAC Address and give the device a Device Name.

- Click [here](#) more information on finding your MAC Address

You can also share access with your devices to others by checking the box next to **Enable AirGroup** and then typing the username (Ex., *jdoe*; NOT *jdoe@hsc.edu*) under **Shared With**. You can add multiple usernames here, just separate each one with a comma. You can only share access via AirGroup to other H-SC accounts.

[Back to main](#)

If you go to **Manage Devices**, you can see the device you just created and any other devices you have created. Again, you can only create 5 devices, so if you need to remove a device to meet that quota you can do so here. Simply click on the device and you will be prompted with your options.

Use this page to manage your devices.
