

Pre-visit Risk Assessment for Hampden-Sydney College

The purpose of this risk assessment and questionnaire, which has been developed with criteria from the CDC, will help determine whether you and your family members meet the criteria for a visit to the Hampden-Sydney College campus during the coronavirus pandemic.

First, we ask that if you or any member of your household fits the CDC category of “older adults or persons with severe underlying health conditions that are at increased risk,” you please not visit the campus. For details about this CDC risk category, see <https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/people-at-higher-risk.html>

Also, we also ask that if you or any member of your household is experiencing or has experienced any of the following symptoms in the past 14 days, you please not visit the campus:

- Cough (not related to allergies)
- Shortness of breath
- Difficulty breathing
- Fever

If you or any member of your household answers YES to any of the following questions, it may still be possible for you and your family to visit campus. However, we ask that you please call the Admission Office at 434-223-6120 to discuss the circumstances so that we may determine when it would be safe for you to do so in person.

1. Have you been tested for the coronavirus and are awaiting the results?	YES	NO
2. Have you tested POSITIVE for the coronavirus?	YES	NO
3. Have you or has a member of your household had prolonged close contact with someone who tested positive for the coronavirus?	YES	NO
4. Has a member of your household been tested for the coronavirus and is awaiting the results?	YES	NO
5. Have you or has a member of your household been asked by a medical professional to isolate for potential coronavirus?	YES	NO

If you and your household members are able to answer NO to all of the previous questions, we look forward to hosting you on campus soon! I have attached a campus visit protocol that we ask all families to observe while visiting Hampden-Sydney College this academic year.
